

SILVER MARKET ALERT

GOLD TO SILVER RATIO OVER 100 TO 1

In today's fast-moving markets, certain signals can reveal rare opportunities. Right now, one of the clearest is the gold to silver ratio. The gold to silver ratio represents the number of silver ounces to buy one ounce of gold. While gold continues to break records, silver has yet to catch up. At Austin Rare Coins & Bullion, we believe this widening gap presents a timely opportunity for savvy investors.

Gold is Soaring

- Recently surged past \$3300/oz - an all-time high
- Up over 20% in 2025 due to a falling dollar and economic

Silver is Lagging

- With silver under \$33, the ratio is over 100:1
- Ratio was 15:1 in ancient times and between 40 and 70:1 in modern times

What It Means

- Silver is severely undervalued in relation to gold
- Only the third time in history this has occurred

Silver is really attractive right now with strong industrial and monetary demand, low premiums, and quick delivery times. It is far below the all-time high of \$50 an ounce set in 1980 with a far weaker dollar today compared to then. Now is an ideal time to acquire the metal or to consider a gold for silver trade. Call 1-800-928-6468 to discuss your options and pricing.

TODAY'S TOP SILVER RECOMMENDATION: 2025 AMERICAN EAGLE SILVER DOLLAR
